

## TC12-100/TC17-100 Uncooled Thermal Camera Modules

Field Proven Ultra Low Power VGA/XGA/SXGA Sensor Options

OV17/OV12 Series thermal cameras offer high imaging performance and used in many military and industrial applications such as surveillance systems, UAVs, IR seekers, thermal weapon sights and driver vision cameras.

TC12-100 and TC17-100 devices are 12 µm and 17 µm pixel pitch thermal camera modules which offers excellent thermal imaging performance. They are ultra-low power (as low as **600 mW**) and has ultra-fast start-up time (smaller than 2 seconds).

These products support 640x480, 1024x768 and 1280x1024 sensor resolutions with up to 60 fps frame rate. Beside analog video interface Parallel video, Camera Link video, Ethernet and SDI digital video interfaces are supported.

They can be customized to control peripheral devices such as Day TV cameras, analog/digital OLED displays, continuous zoom optics and laser range finders. By this way, they offer ultra-compact system solutions to their users.

## Technical Specifications

•	
Array Type	Uncooled Microbolometer
Detector Pitch	12 μm/17 μm
Spectral Band	8 to 12 μm
Sensitivity	< 30mK / < 50 mK
Power Supply	3.0 V to 5.5 V / 6.0 V to 15 V
Power Consumption	600 mW
Frame Rate	25/30/50/60 Hz
Sensor Resolution	640x480 / 1024x768 / 1280x1024
Time-to-image	< 2 seconds
Image Processing	Adaptive temporal and spatial noise cancelation,
	digital detail enhancement, local contrast
	enhancement, image enhancement, color palette,
	electronic zoom
Digital Video Interface	Parallel, Camera Link, Gigabit Ethernet, HD/3G SDI
Analog Video Interface	PAL, NTSC
Working Temperature	-40 °C, +71 °C
Mechanical Dimensions (mm)	42x42x39
Applications	Driver Vision Systems, Thermal Weapon Sights,
	Surveillance Cameras, UAVs, Remote Weapon
	Stations, IR Seekers
